The benefits of education and of useful knowledge, generally diffused through a community, are essential to the preservation of a free government.

Sam Houston

Cultivated mind is the guardian genius of Democracy, and while guided and controlled by virtue, the noblest attribute of man. It is the only dictator that freemen acknowledge, and the only security which freemen desire.

Mirabeau B. Lamar

EXPLANATION

The University publications are so numbered that the first two digits of the number show the year of issue, the last two the position in the yearly series. For example, 4101 is the first publication of the year 1941. These comprise the official publications of the University, publications on humanistic and scientific subjects, and bulletins prepared from time to time by various divisions of the University.

The omission of a number from its place in the consecutive order indicates that the number has not been used. The following serial numbers have not been used:

In the 1941 series: 4103, 4104, 4105, 4108, 4110, 4112, 4122, 4123, 4124, and 4146.

In the 1942 series: 4201, 4204, 4206, 4217, 4218, 4221, 4222, 4223, 4225, 4227, and 4244.

The following bureaus and divisions distribute publications issued by them; communications concerning publications in these fields should be addressed to The University of Texas, Austin 12, Texas, care of the bureau or division issuing the publication: Bureau of Business Research, Bureau of Economic Geology, Bureau of Engineering Research, Bureau of Industrial Chemistry, Bureau of Public School Service, and Division of Extension. Catalogues of the Medical Branch, including the John Sealy College of Nursing, are distributed by the Medical Branch, Galveston. Communications concerning all other publications of the University should be addressed to University Publications, The University of Texas, Austin 12, Texas.
